

PROFESSIONAL SUMMARY

AIML student with basic knowledge of Python, C++, HTML, and CSS, and understanding of machine learning concepts. Strong problem-solving ability and keen interest in developing practical AI-based solutions.

KEY EXPERTISE

python programming C || C++(basic programming concept) HTML|| CSS Communication Skills Critical thinking
Creative Problem Solving

EDUCATION

Oriental Group of Institutes	2027
B.Tech. - CSE - Artificial Intelligence and Machine Learning - Oriental Institute of Science and Technology, Bhopal	CGPA: 7.49 / 10
Government Girls Higher Secondary School Deori, Raisen	2022
12 th MPBSE Percentage: 88.20 / 100	
Government High School Timrawan, Raisen	2020
10 th MPBSE Percentage: 84 / 100	

PROJECTS

ArthiX: A Language Agnostic Translator

Team Size: 3

Key Skills: Communication Skills Documentation Skills System Design & Architecture

Project Description

This project focuses on developing a multi-modal translation system that can handle text, speech, and programming code within a single platform. The main aim is to reduce language barriers and make communication easier for users across different domains. The system is designed to automatically detect the input type and language, and then provide accurate translation in real time. It uses Natural Language Processing (NLP) for text translation, speech processing techniques for voice input and output, and a code processing module to convert programming code between different languages. One of the unique features of the system is its ability to validate translated code through execution, ensuring correctness. The system also supports offline functionality and stores translation history locally for better usability and privacy.

Role as Corresponding Author

As the corresponding author, I was responsible for managing both the technical and research aspects of the project. My role included:

- Constructing the design and development of the system
- Conducting experiments and analyzing system performance
- Preparing and structuring the research paper
- Ensuring the content is original, well-organized, and plagiarism-free
- Coordinating with co-authors and incorporating feedback
- Handling communication with the conference/journal (submission, updates, revisions)
- Preparing presentation materials and documentation

Outcome of the Project

The project successfully resulted in a working prototype of a unified translation system with the following outcomes:

- Accurate translation of text across multiple languages
- Effective speech-to-text and text-to-speech functionality
- Successful conversion and validation of programming code
- Real-time performance with fast response
- Improved user experience compared to traditional tools
- Reduced need for multiple separate applications

Overall, the system demonstrates strong potential for use in education, software development, and multilingual communication, making it a practical and efficient solution.

PUBLICATIONS / RESEARCH / WHITE PAPERS

ArthiX- A Language Agnostic System for Real -Time , Speech , and Programing Code Translation 25 Dec, 2025
International Journal of Research in Engineering, Science and Management | **No. of Authors: 4**

Key Skills: Communication Skills Documentation Skills

The research paper focuses on addressing the limitations of existing translation systems, which mainly support only text or speech and do not include programming language translation. A major research gap identified is the absence of a unified platform that can handle text, voice, and code translation together. Additionally, many systems lack features such as automatic language detection, offline functionality, and validation of translated code. These limitations create difficulties for users and developers, who often need multiple tools to perform different translation tasks.

To overcome these challenges, the paper proposes a multi-modal translation system that integrates natural language processing, speech processing, and code transformation techniques into a single platform. The system provides real-time translation, automatically detects the input language, and validates translated programming code through execution. The results demonstrate accurate translation, fast response time, and improved usability compared to traditional tools. Overall, the system reduces complexity, enhances productivity, and has strong potential for use in education, software development, and multilingual communication.

ASSESSMENTS / CERTIFICATIONS

Machine Learning with scikit learn

Key Skills: basic of scikit -learn

Certified in Scikit-learn with practical knowledge of Python libraries and core programming concepts. Skilled in applying basic machine learning techniques and problem-solving to build simple data-driven solutions.

Generative AI mastermind

Key Skills: Basic of Python Programming. Machine Learning concepts

Completed a certification in Machine Learning, gaining a strong foundation in core ML concepts and Python programming. Developed problem-solving skills and the ability to apply basic techniques to data-driven tasks.

SEMINARS / TRAININGS / WORKSHOPS

Certificate of Virtual Internship Institute Name: AICTE- EduSkill

PERSONAL INTERESTS / HOBBIES

- Reading Books, Dancing

IMs

- WhatsApp - <https://wa.me/919303151599>

PERSONAL DETAILS

Gender: Female	Date of Birth: 25 Aug, 2005
Marital Status: Single	Known Languages: Hindi, English
Current Address: Narela shankari, Ayodhdhya bypass,Bhopal,MP,, Bhopal, Madhya Pradesh, India - 462021	Permanent Address: Nayakheda, Deori, Udaypura, district- Raisen ,MP, Raisen, Madhya Pradesh, India - 464551
Emails: kavitalodhi833@gmail.com , lodhikavita000@gmail.com	Phone Number: +91-9303204819
